

## **Falstrom Company**

*Position: Metal Worker C*

Perform a variety of machine, bench or floor operations to make simple types of housing, enclosures, cabinets, ducts, pipe, etc., or sections for more complicated units of sheet, plate, structural shapes or castings of various metals.

Work from simple drawings and detailed instructions. Use steel rule, micrometer, calipers, protractor, various gages. Receive instructions and direction from Foreman or higher-grade Metal Worker.

Straighten and square up welded members and sections by bending, hammering or by applied heat. Under direction, build temporary fixtures, holding and location devices, templates and welding jigs to job requirements.

Work on complicated assemblies requiring mechanical fits and welds. Set in doors, panels, brackets and shelves, adjusting and squaring up where necessary. See that surfaces are properly finished according to specifications. Check dimensions for size and square and correct where necessary. Produce product ready for shipping grinders and various grinding equipment.

Occasionally perform installation or erection work on customer's location.

Keep working area clean. Move material in area as necessary. Dispose scrap to proper scrap barrel and move away. Get empty barrels.

### **Requirements:**

- Able to read blueprints
- 3 to 6 months working in a similar position
- Be able to take direction from senior Metal Workers and Supervisors
- Be able to work independently
